TEMPLATE FOR TRB ANNUAL MEETING PAPER

John A. Smith
jsmith@university.edu

Sarah B. Johnson, Ph.D.

Michael C. Williams, Ph.D., Corresponding Author
mwilliams@research.org

Word Count: 204 words + 1 table(s) × 250 = 454 words

Submission Date: December 27, 2024

ABSTRACT

Abstract

Keywords: Keyword1, Keyword2

INTRODUCTION

More details about the manuscript details can be found online at `http://onlinepubs.trb.org/onlinepubs/AM/InfoForAuthors.pdf`.

This template is based on the 3.1 Lite unofficial TRB template (`https://github.com/chiehrosswang/TRB_LaTeX_tex`). The main differences are how it does the bibliography, and that you can choose any filename for the main .tex file (instead of having to name it trb_template.tex).

The bibliography style is `elsarticle-num-names`. You use the `\citet` and `\citep` commands like in standard `natbib`. To do an in text citation like Williams and Brown (1), type `\citet{Williams2022}`. To do parenthetical citations like (2, 3), use `\citep{Smith2023,Chen2022}`. The template comes with a BibFile.bib file you can put your bibtex entries in.

Here is a figure. Reference it with `\ref{fig:figure}` like Figure 1. Likewise, you can reference a table with `\ref{tab:table}` like Table 1.

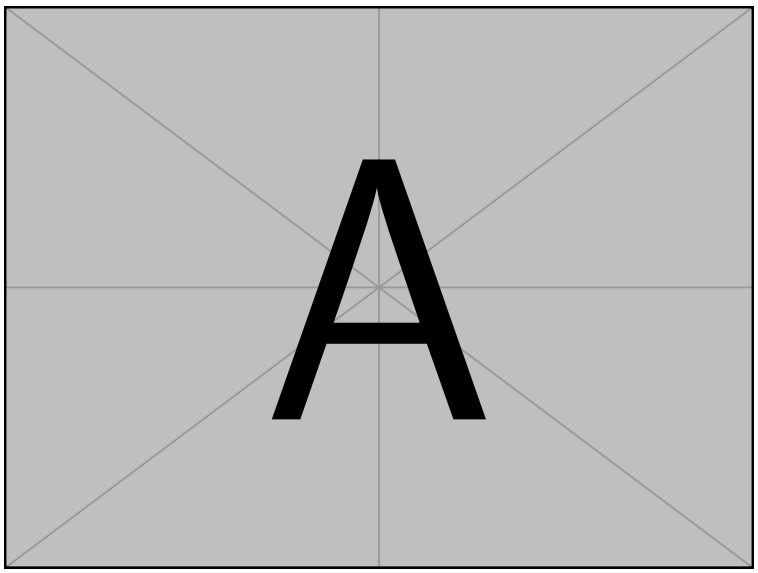

FIGURE 1 Put your figure here. A figure is worth 250 words.

TABLE 1 Here is a table.

Mode	Passengers (M)	Distance (km)	Cost ($)	Time (min)
Bus	245.3	12.4	2.50	35
Light Rail	189.7	8.9	3.00	22
Subway	892.1	15.2	2.75	28
Rideshare	156.4	9.7	15.50	18
Bike Share	78.2	3.5	4.00	25
Ferry	45.9	11.8	5.50	40
Commuter Rail	234.8	42.3	8.75	55
Streetcar	67.5	5.6	2.25	30

For equations, use the `\begin{linenomath}` and `\end{linenomath}` commands. Here are three equations aligned with the flalign environment.

$$\alpha_1 + \beta_1 = \gamma_1 \tag{1}$$

$$\alpha_2 + \beta_2 = \gamma_2 \tag{2}$$

$$\alpha_3 + \beta_3 = \gamma_3 \tag{3}$$

Here is a regular equation:

$$s^*(v_\alpha, \Delta v_\alpha) = s_0 + v_\alpha T + \frac{v_\alpha \Delta v_\alpha}{2\sqrt{ab}} \tag{4}$$

ACKNOWLEDGEMENTS

This template is based on the 3.1 Lite unofficial TRB template (`https://github.com/chiehrosswang/TRB_LaTeX_tex`) created by Chieh Ross Wang, David Pritchard, and Gregory Macfarlane.
